

Baby Head Ultrasound

Patient: _____

Appointment Date: _____ Time: _____ am / pm

Location: Diagnostic Imaging Department at Mankato Clinic
1230 East Main Street, Mankato, MN 56001

Before the Exam:

A baby head ultrasound uses sound waves, not radiation, and an instrument called a transducer to obtain images of the structures of the brain.

- There are no dietary restrictions for this exam.
- Arriving late will result in rescheduling your exam.

During the Exam:

- The baby will be placed on a bed on their back.
- This exam may take up to 30-60 minutes to complete.
- Warm gel will be placed on the child's head.
- A transducer will be placed on the head and moved around during the exam.
- The sonographer will take several images.
- The images will be reviewed and read by a radiologist.
- The final signed report will be sent to the provider that ordered your exam.

After the Exam:

- The child may resume their regular routine unless given other instructions.

Your exam will be reviewed and read by a Radiologist within the next 24 hours. A report will go to your provider for him/her to review. Your provider is responsible for communicating the results to you and this will be done by letter, a phone call, or a follow up appointment. If you don't have a follow up appointment scheduled and have not heard anything within a week, you have the right to call your provider's department and inquire about results.

If you are unable to keep your appointment or have questions about your exam, please call 507-389-8570.

Please check in at Patient Registration prior to going to the Diagnostic Imaging Department.
