Please check in at Central Registration prior to going to Diagnostic Imaging.

If you are unable to keep your appointment or have questions, please call (507) 389-8570.

What is an Aorta Ultrasound:

An aorta ultrasound uses sound waves, not radiation, and an instrument called a transducer to obtain images of your abdominal aorta and iliac arteries. The aorta is the main artery in your abdomen that carries blood from your heart to your abdomen, pelvis and legs.

How do I prepare for the test:

- Eight hours prior to your test, **DO NOT** eat or drink anything. This includes no smoking and no chewing gum.
- You may take your morning medication with a small amount of water.
- We recommend that you contact your insurance company prior to your appointment to understand what your coverage is for this test.
- To provide our best services and safety practices to you during your visit, we respectfully ask that young children do not attend parental appointments and we appreciate your understanding.
- Arriving late or not following the above preparation instructions may result in rescheduling your test.

What will happen during the test:

- You may be asked to undress. A gown will be provided.
- You will be asked to lie on a bed.
- This test may take up to 30-60 minutes to complete.
- Warm gel will be placed on your abdomen.
- A transducer will be moved around on your abdomen during the test, and pressure may be applied to improve the quality of the image.
- The sonographer will take several images, and you may be asked to hold your breathing for certain pictures.
- At times you will hear loud noises that sound like a heartbeat as the sonographer listens to the blood flow.

Instructions for after your test:

- You may resume your regular diet unless you have been given other instructions.
- Your test will be reviewed and read by a Radiologist within the next 24 hours.
- Your test results will be available in your patient portal immediately after your provider reviews them. Your provider will discuss the results with you at your follow-up appointment. If you do not have a follow-up appointment, your provider will contact you by letter or phone within five to seven business days.
